mynesso.com/PastorJoshDavies

Back in 2005, I decided to try my hand at creating custom MySpace themes and dove head first into the rabbit hole of coding and web development. Fast-forward to today, and I've had the privilege of building software for an advertising agency, a full fledged development company, a hosting company, and a woocommerce studio.

My main focus these days is building hobby SaaS applications like MyNesso as well as design top-notch backend solutions for clients at Camna. I most enjoy building software in the sweet spot where design and engineering meet — things that look good but are also built well under the hood. In my free time, I love to just code anything and everything I can get my hands on. I have a goal of building a new SaaS application every 3 - 4 months. Check out my portfolio to see more.

When I'm not at the computer, I'm usually hanging out with my wife and three daughters, hiking, or running around Wyoming searching for new trails and peaks to hike. I love to write, I actually published my first book *Why Do I Matter* in May of 2024. If I'm not reading one you can find me working on my next.

WORK EXPERIENCE

Cosaprk

Back-End Software Engineer

Build and maintain critical components for cospark clients. I work closely with teams, including front-end developers, designers, and product managers, to implement back-end functionality for WordPress and Woocommerce that make the user's experience the best they can have.

January 2023 - Present |

Camna LLC

Software Engineer

Build and maintain critical components for CAMNA clients around the globe. Work closely with cross-functional teams, including front-end developers, designers, and product managers, to implement back-end functionality that makes the user's experience the best they can have.

November 2014 - Present | Virginia, United States

Smithworks Design And Communications

Lead Engineer

Build, style, and ship high-quality websites, design systems, mobile apps, and digital experiences for a diverse array of projects for clients including Stoney Bank Nurseries, Drohan Brick, MYCO Mechanical, Cocoon9, The Whip Tavern, Chester County Historical Society, and more. Provide leadership within engineering department through close collaboration, knowledge shares, and spearheading the development of internal tools.

September 2011 - November 2014 | Pennsylvania, United States

Community Church

Creative Arts Volunteer / Intern

Developed, maintained, and shipped production designs and code for church website and events. Including the design of Sunday Mornings Service, Stage Designs, Sermon Series Graphics and Videos, Website management/updates, and more.
